

Serie di tavoli bassi in cristallo trasparente extralight o acidato bifacciale extralight, caratterizzati da pulizia formale, delicate proporzioni e cura dei dettagli. Le gambe e il piano vengono sagomati, bisellati a 45°, temperati e termosaldati tra di loro. Grazie alla particolare struttura del tavolo ed al processo di tempera, nonostante lo spessore sottile del cristallo, è garantita una notevole resistenza ai carichi.

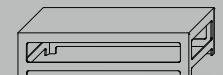

Collection of low tables in transparent extralight or in double-faced extralight acid-etched glass, characterized by clean formality, delicate proportions and attention to detail. The legs and the top are shaped, chamfered 45°, tempered and thermo-welded together. A remarkable loading capacity is achieved through the particular structure of the table and the tempering process, despite the slenderness of the glass.
