

RAINBOW

Design by:
Roberto Lazzeroni

Year:
2011

A classic revisited piece designed by Roberto Lazzeroni: Rainbow is a container characterised by fine works and finishes, that stands out for the vintage metal support and the appealing graphics of the facade. The doors and the lacquered wooden frame can be painted in a single colour chosen from over 40 tones in Lema's catalogue, or in two different combinations: avio, cacao, grafite, sabbia and caffè or pomice and carta fumo. Particular care is paid to details like the practical 180° opening of the doors.
