

VANITY

Design by:
Alessandro Dubini

Year:
2009

Inspired to the fairy tales, Vanity by Alessandro Dubini profits from different surface bending to create lively optical illusions and widen at best the concept of vanity. The extra-size frame in bright stainless steel is leaning against the wall for a single segment while the rest is removed from the wall. The mirror is hanging and reflects the figure being framed by a decoration inside the border, silk-screened, and recalling the classic styles, a detail that underscores the brand's care for details.
